

Narrative use case

Student Information System (SIS)

Narrative Use Case Descriptions

Use Case 1: Login

Actors: Student, professor, Admin Staff

Description: Allows users to log in to the system.

Preconditions:

- User must be registered.

Main Flow:

1. User enters email and password.
2. System validates credentials.
3. User is redirected to dashboard.

Alternative Flow:

- Invalid credentials → error message displayed.

Postconditions:

- User is authenticated.

Use Case 2: Enroll Course

Actors: Student

Description: Allows a student to enroll in a course.

Preconditions:

- Student must be logged in.

Main Flow:

1. Student selects a course.
2. System checks course existence.
3. Student is enrolled.

Postconditions:

- Enrollment recorded.

Use Case 3: Drop Course

Actors: Student

Description: Allows a student to drop a course.

Preconditions:

- Student must be logged in.

Main Flow:

1. Student selects course to drop.
2. System checks course existence.
3. Course is dropped.

Postconditions:

- Course removed from schedule.

Use Case 4: View Course Info

Actors: Student

Description: Allows viewing course details.

Preconditions:

- Student must be logged in.

Main Flow:

1. Student selects course.
2. System displays course information.

Postconditions:

- Course info displayed.

Use Case 5: View Department Data

Actors: Student

Description: Allows viewing department information.

Preconditions:

- Student must be logged in.

Main Flow:

1. Student requests department data.
2. System displays data.

Postconditions:

- Department data shown.

Use Case 6: View Personal Data

Actors: Student

Description: Allows students to view personal information.

Preconditions:

- Student must be logged in.

Main Flow:

1. Student selects personal data option.
2. System retrieves and displays data.

Postconditions:

- Personal data displayed.

Use Case 7: View Grades

Actors: Student

Description: Allows students to view grades.

Preconditions:

- Student must be logged in.

Main Flow:

1. Student selects view grades.
2. System displays grades.

Postconditions:

- Grades displayed.

Use Case 8: View Schedule

Actors: Student

Description: Allows students to view schedule.

Preconditions:

- Student must be logged in.

Main Flow:

1. Student selects view schedule.
2. System displays schedule.

Postconditions:

- Schedule shown.

Use Case 9: View Exam Result

Actors: Student

Description: Allows students to view exam results.

Preconditions:

- Student must be logged in.

Main Flow:

1. Student selects exam results.
2. System displays results.

Postconditions:

- Exam results shown.

Use Case 10: View Attendance Records

Actors: Student

Description: Allows students to view attendance records.

Preconditions:

- Student must be logged in.

Main Flow:

1. Student selects attendance records.
2. System displays attendance.

Postconditions:

- Attendance records displayed.

Use Case 11: Search for a Book

Actors: Student

Description: Allows students to search library books.

Preconditions:

- Student must be logged in.

Main Flow:

1. Student enters search keywords.
2. System displays matching books.

Postconditions:

- Search results shown.

Use Case 12: Borrow a Book

Actors: Student

Description: Allows students to borrow a book.

Preconditions:

- Student must be logged in.

Main Flow:

1. Student selects a book.
2. System checks book availability.
3. Book is borrowed.

Postconditions:

- Borrowing recorded.

Use Case 13: Return a Book

Actors: Student

Description: Allows students to return borrowed books.

Preconditions:

- Student must have borrowed a book.

Main Flow:

1. Student initiates return.
2. System updates book status.

Postconditions:

- Book returned.

Use Case 14: Check Course Existence

Actors: System

Description: Verifies if a course exists.

Preconditions:

- Course request initiated.

Main Flow:

1. System searches course database.
2. System confirms existence.

Postconditions:

- Course validity confirmed.

Use Case 15: Check Book Availability

Actors: System

Description: Checks if a book is available.

Preconditions:

- Book selected.

Main Flow:

1. System checks inventory.
2. Availability status returned.

Postconditions:

- Availability confirmed.

Use Case 16: Register Student

Actors: System

Description: Registers a student in the system.

Preconditions:

- Valid student data provided.

Main Flow:

1. System stores student data.
2. Student account is created.

Postconditions:

- Student registered.

Use Case 17: Assign Grades

Actors: Professor

Description: Allows professor to assign grades.

Preconditions:

- Professor must be logged in.

Main Flow:

1. Professor selects course.
2. Professor assigns grades.
3. System saves grades.

Postconditions:

- Grades recorded.

Use Case 18: Record Attendance

Actors: Doctor

Description: Allows doctors to record attendance.

Preconditions:

- Professor must be logged in.

Main Flow:

1. Professor selects course.
2. Attendance is recorded.

Postconditions:

- Attendance saved.

Use Case 19: Record Exam Result

Actors: Professor

Description: Allows recording exam results.

Preconditions:

- Professor must be logged in.

Main Flow:

1. Professor enters exam results.
2. System saves results.

Postconditions:

- Exam results recorded.

Use Case 20: Set Exam

Actors: Professor

Description: Allows doctors to create exams.

Preconditions:

- Professor must be logged in.

Main Flow:

1. Professor sets exam details.
2. System saves exam.

Postconditions:

- Exam created.

Use Case 21: View Student List

Actors: Professor

Description: Allows viewing enrolled students.

Preconditions:

- Professor must be logged in.

Main Flow:

1. Professor selects course.
2. System displays student list.

Postconditions:

- Student list shown.

Use Case 22: View His Academic Data

Actors: Professor

Description: Allows Professor to view academic data.

Preconditions:

- Professor must be logged in.

Main Flow:

1. Professor requests academic data.
2. System displays information.

Postconditions:

- Academic data displayed.

Use Case 23: View Info

Actors: Admin Staff

Description: Allows admin staff to view system info.

Preconditions:

- Admin staff must be logged in.

Main Flow:

1. Admin selects view info.
2. System displays information.

Postconditions:

- Info displayed.

Use Case 24: Assign Professor to Course

Actors: Admin Staff

Description: Assigns professor to a course.

Preconditions:

- Admin staff must be logged in.

Main Flow:

1. Admin selects course and professor.
2. System assigns professor.

Postconditions:

- Assignment completed.

Use Case 25: Add Course

Actors: Admin Staff

Description: Adds a new course.

Preconditions:

- Admin staff must be logged in.

Main Flow:

1. Admin enters course details.
2. System saves course.

Postconditions:

- Course added.

Use Case 26: Remove Course

Actors: Admin Staff

Description: Removes a course.

Preconditions:

- Admin staff must be logged in.

Main Flow:

1. Admin selects course.
2. System removes course.

Postconditions:

- Course removed.

Use Case 27: Update Course

Actors: Admin Staff

Description: Updates course details.

Preconditions:

- Admin staff must be logged in.

Main Flow:

1. Admin edits course info.
2. System saves changes.

Postconditions:

- Course updated.

Use Case 28: Allocate Class

Actors: Admin Staff

Description: Allocates classes to courses.

Preconditions:

- Admin staff must be logged in.

Main Flow:

1. Admin assigns classroom.
2. System saves allocation.

Postconditions:

- Class allocated.

Use Case 29: Get Class Info

Actors: Admin Staff

Description: Retrieves class information.

Preconditions:

- Admin staff must be logged in.

Main Flow:

1. Admin requests class info.
2. System displays details.

Postconditions:

- Class info shown.
